- Redhat Linux, Debian GNU / Linux, Slackware Linux, Fedora Linux, SuSE Linux, FreeBSD

Windows 98, Windows XP (Pro/Home Edition), Windows Vista, Windows 2000 Server Edition, Windows Server 2003, 2008, 2012, 2012 R2

In my work environment I had to work with IBM xSeries 345, Wide variety of HP servers, VMware based Virtual servers, Citrix, Remote administration via SSH, VNC, TeamViewer, VPNs.

As a hobbyist I have experience with the Following Operating systems:

1. DR-DOS 4.0
2. MS-DOS , 5.0, 6.0, 7.0
3. Knoppix Linux, Puppy Linux
4. MS Windows 3.11, Basically most of Windows OS desktop and server OS-es
5. Menuet OS
6. NetBSD
7. OpenBSD
8. DragonFlyBSD, FreeSBIE, FrenzyLiveCD, pfSense
9. OpenVMS

My primary strenghts are into Computer Security, Networking and Bash scripting. I have decent knowledge (intermediate level) in the following Languages: Basic, Borland Pascal, C, Bash, Perl. I have basic knowledge with (Python, Ruby, C++, Fortran)

Digital competence

I have good working experience with the following Services and Technologies.

- Building and maintenance of Network Gateways, Routers (NAT, Masquerade)
- Work with Switches, Wireless Routers (3Com, LinkSys, CNet) and wiring small and middle sized networks.
- Building and maintenance of Samba Servers
- Building and maintenance of (middle sized networks):

In my working experience I've succesfully managed the following mail server technologies and services.

* Qmail servers with POP3/POP3s services (vpopmail), courier IMAP/IMAPs, ClamAV, RBL, Pyzor, Razor, DCC, Bayesian filters,

SpamAssassin (writing custom spam catc1h rules), qmailscanner.

* Postfix servers (I was taking care of 3 postfix servers at Design.BG) and configured a number of postfix mail servers as a free lancer

* Sendmail servers (Have installed and configured few sendmail servers for customers)

* Exim

I have also good experience basis with:

- Isoqlog, Qmailalizer, Qmailadmin, VQadmin, Qmailmrtg, Qsstats (installation and configuration)

- Sqwebmail, Horde, Squirrelmail (installation, Maintenance and configuration)

- Webalizer, Awstats, Munin, Icinga, Cacti, Nagios, Zabbix (Installation, configuration and maintenance)

- Squid Proxy Server, Privoxy and Tinyproxy installation, maintenance and configuration, transparent proxy, ACLs etc.

- Firewall configuration and maintenance: Ipchains, Iptables, OpenBSD, PF

- MySQL Community (installation, maintenance, configuration, optimization for performance), mysqladmin

- PostgreSQL (installation, basic configuration)

- Bind DNS (Configuration and maintenance of our three company Internet DNS Resolve serves, also the configuration and maintenance of local

caching bind servers.

- djbdns (Installation, Configuration and maintenance)

- Frequently Used Bash in writing scripts and perl shell scripting for system maintenance and creating MySQL and Data backups on

Regular basis

- Tweakening Different Linux servers for performance

- Proftpd, vsftp, wu-ftp (Installation Configuration and Maintenance)

- Linux Jailkit, FreeBSD Jail creation and configuration

- NTP (Maintenance and configuration of time servers)

- Good Knowledge on Linux and FreeBSD CRON Services

- Installation configuration and maintenance of Windows XP Desktop machines

- Experience with:

Snort, TripWire and others program,tools which tighten security of a server and a network.

- HTML/CSS/PHP/MySQL simple web pages creation, writing basic PHP forms, developing webpages etc.

- Experience in Installation Automation solutions for servers / services (DevOps) mostly in bash shell scripting

- Experience in compiling and debugging softwares written in C, C++, Python, Ruby, program reading understanding for above programming languages

- Experience in installing 3rd party vendor Software on a variety of Windows OSes with and without of third party vendors over Lync and Skype for Business

- 13 years experience in using GNU / Linux various distributions and BSDs as a desktop, experience

in installing and maintaining Free Software OSes for users with no experience with free software and configuring Free OS systems as a substitute software platforms for Proprietary OS such as Windows

I've taken participation in a seminar for the Dobrich citizens who have interest in Free Software and actively working for the success of Free Software as understood by GNU and Richard Stallman

Note the Linux organized seminar's webpage is in Bulgarian since it targeted Bulgarian audience, it is located here: <http://linux-seminar.pc-freak.net>

Moreover I have experience with the following technologies in my previous job locations:

- Sun Java JDK, JRE, Resin, Tomcat, WebSphere, Weblogic
- Flash Media Server Installation/ Configuration- Installation and configuration of OpenVPN / PPP Servers- Knowledge in LDAP and OpenLDAP protocols

Other skills - Good listener In my University studies. I have participated in an extra voluntary module called "TheatreSports"

I have written a couple of poems and have created few websites dedicated to social culture, philosophy and religion.

I'm running a person website outlining many subjects of interest I possess.
