Remove print, pdf and Email to a friends tiny icons from your Joomla Posts

Author : admin

sI've blogged in my previous blog that this days I'm mostly learning joomla, because I need it to fix a website.
One of the things in the Joomla website that needed adjusting to make the website look a bit more professional was the removing of the default 3 small icons supposed to be useful reading **Email to a friend** , **Print webpage** and **Email to a friend**

Removing the 3 icons and the links seemed to be very easy to remove them. I had to partake the following steps:

1. **Go to Joomla's administration page and login**

2. **Go to Article Manager**

Content -> Article Manager

3. **Move through all the articles and click each of the articles**

There you have to click further to **Parameters** and make sure that for:
PDF Icon , *Print Icon* and *E-mail Icon* is set to **Hide**

After completing this press the Save button located in the upper right corner of the webpage.
Note that by default this three paramers value will be set to Global and if the 3 icons are not set to a Hide in Global settings, the icons will continue appearing until the *Hide* for the three ones is selected.
