World Fastest Md5 cracker

Author : admin

A friend of mine (SIC-a) referred me to a great article on the topic of password cracking.It seems some guy out there has created a md5 password cracker which is claimed to be the world'slargest password cracker. The article could be seen here Enjoy!The idea behind the cracker is that it takes advantage of the Video card (GPU) or in other words the video CPU.It's reported to work with NVidia 8xxx++ and a couple of others :)END-----
