Install Microsoft Office 2007 on Debian Linux 7.0 Wheezy

Author : admin

Here is few steps I followed to *install succesfully Microsoft.Office.Enterprise.2007.bg-BG.SP2.Integrated on my recently installed Debian stable Wheezy Linux***.**

1. Install Wine and Winetricks

linux:~# **apt-get install --yes winetricks wine**
....

2. Download Microsoft XML support - msxml3.msi

Download URL for MS XML from CNET is here -

For simplicity I've mirrored *msxml3.msi* .
linux:~$ **cd ~/.cache/winetricks/msxml3/**
linux:~/.cache/winetricks/msxml3$ **wget -q http://www.pc-freak.net/files/msxml3.msi**
linux:~/cache/winetricks/msxml3$ **winetricks msxml3**

3. Insert Microsoft Office 2007 CD or ISO

To Mount it you need to go in root shell:

To mount CD;

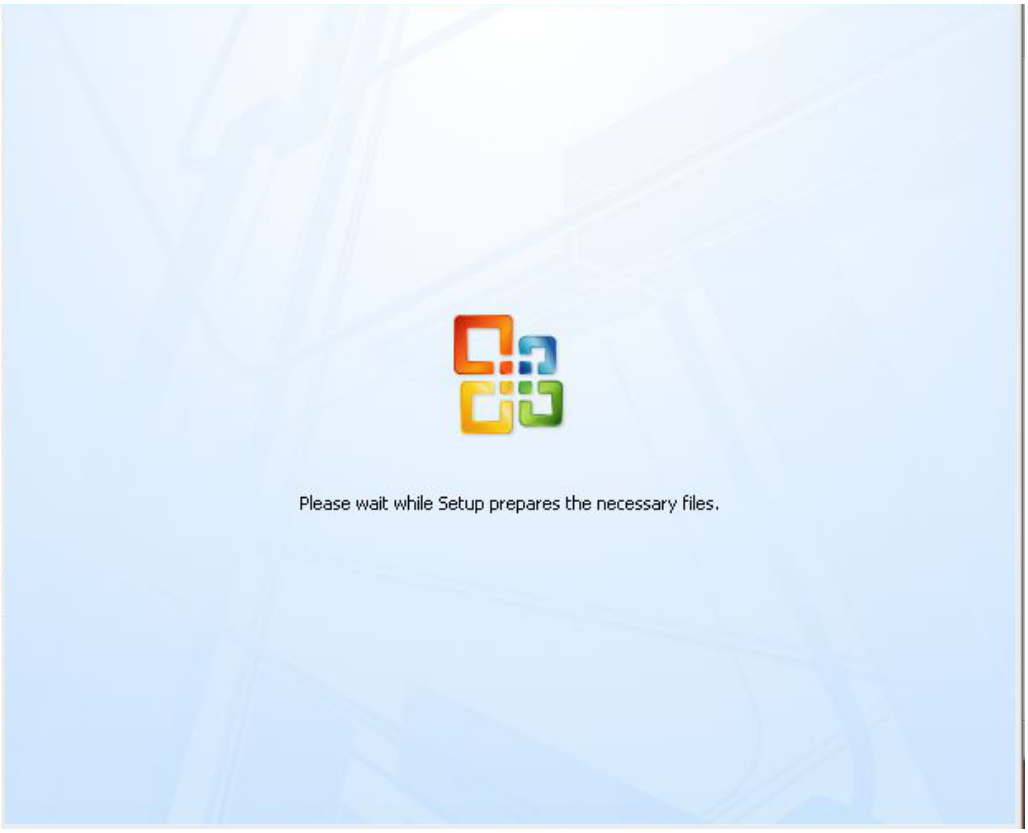

linux:~# **mount -t iso9660 -o unhide /dev/cdrom /media/cdrom**

To mount MS Office 2007 from ISO file:

linux:~# **mkdir /mnt/ISO**
linux:~# **mount -t iso9660 -o loop Microsoft.Office.Enterprise.2007.bg-BG.SP2.Integrated.iso /mnt/ISO/**

4. Launch MS Office installation with WINE emulator

linux:~# wine **/mnt/ISO/Microsoft.Office.Enterprise.2007.bg-BG.SP2.Integrated/setup.exe**

Follow normal installations steps Install and Enjoy.

To start Microsoft Office further follow menus:

Applications -> Wine -> Programs -> Microsoft Office
