

New FreeBSD version is out - Hello FreeBSD 9.2

Author : admin

FreeBSD

9.2

FreeBSD 9.2 is out today. There are mostly improvements in *FreeBSD's* **ZFS**. As usual BSD packages are updated with new ones. This version of BSD does not include anything revolutionary. Below are all the major changes in the distro. A list of all new introduced supports in that release as usual is in BSD's [release notes](#)

To all BSD users - Happy new BSD release :)
