# Richard stallman (father of free software) interview - Stallman: Google+ and Facebook mistreat their users

Author : admin

The idea of copyright did not exist in ancient times, when authors frequently copied other authors at length in works of non-fiction. This practice was useful, and is the only way many authors' works have survived even in part.

— Richard Stallman —

AZ QUOTES

The father of free software, mr. Richard Stallman is notorious for his critical mind and software freedom activism quite well.

While checking some of his speaches and interviews, I came across another interesting, one here RMS critices and exposes the bad and evilness of fb and Google+.

Interview with Richard Stallman - Stallman: Facebook and Google+ Mistreat Their Users

People unaware of computer networks, programming, Unix and the deep computing so to say definitely didn't understand the profoundness of upcoming problems of so called "social networks". The **Facebook and Google+ Mistreat Their Users** video is also to be found in *youtube* under name **Richard Stallman: Facebook IS Mass Surveillance** .

Its a pity Stallman is mostly popular only among specific users like me which are already 'dubbed' into free software and have a belief that computer software should be free. Hopefully as time passes more and more people will be awakened to listen to his speeches and realize the severeness of problems, we face nowdays by simply accepting almost anything new without much privacy concerns ...
If you're a free software enthusiast like me, please take the time to share the video and whistle-blow about

the problem to as many non-tech pc users as possible :)
