

# APTITUDE TEST E51

(REVISION 3)

for **electronic**

**data-processing programmers**

NAME \_\_\_\_\_

ADDRESS OR COMPANY \_\_\_\_\_

**FILL IN THE ABOVE BLANKS, AND THEN STUDY THESE DIRECTIONS CAREFULLY:**

In this booklet, a number of problems are stated in the form of flow-charts.

- 1 A flow-chart is simply a "road map" by which you must find your way from one "town" to the next, and obey every instruction you come to.
- 2 Always follow the "road" downward, or to the right, unless an arrow indicates a different direction, or unless an instruction requires you to do otherwise.
- 3 When you come to a fork in the "road" there will be a question for you to answer; match your answer with the "signposts" on the branches leading out of the fork, and you will know which way to go.
- 4 When you are told to put a number into a box, it is understood that whatever number was previously in that box has just been erased.
- 5 Mark up the flow-charts in any way you feel will help you. Use the margins, or the blank left-hand pages, for your "scratch" work. **Do all your work in this booklet.**
- 6 When you are finished, copy your answers into the spaces on this cover. **Use extreme care in doing so**, since this copy of your answers will be used in scoring the test.

# EXAMPLE A:

The Core Memory Project

|         |   |   |   |   |    |   |    |    |    |    |
|---------|---|---|---|---|----|---|----|----|----|----|
| Box No. | 1 | 2 | 3 | 4 | 5  | 6 | 7  | 8  | 9  | 10 |
|         | 6 | 3 | 9 | 2 | 11 | 2 | 91 | 48 | 66 | 1  |

START

1

Add: (number in box 4) + (number in box 2), put result into box 7.

2

Add: (number in box 7) + (number in the box whose number is in box 6), put result into box 6.

3

Multiply: (number in box 6)  $\times$  (number in box 1), put result into box 5.

END

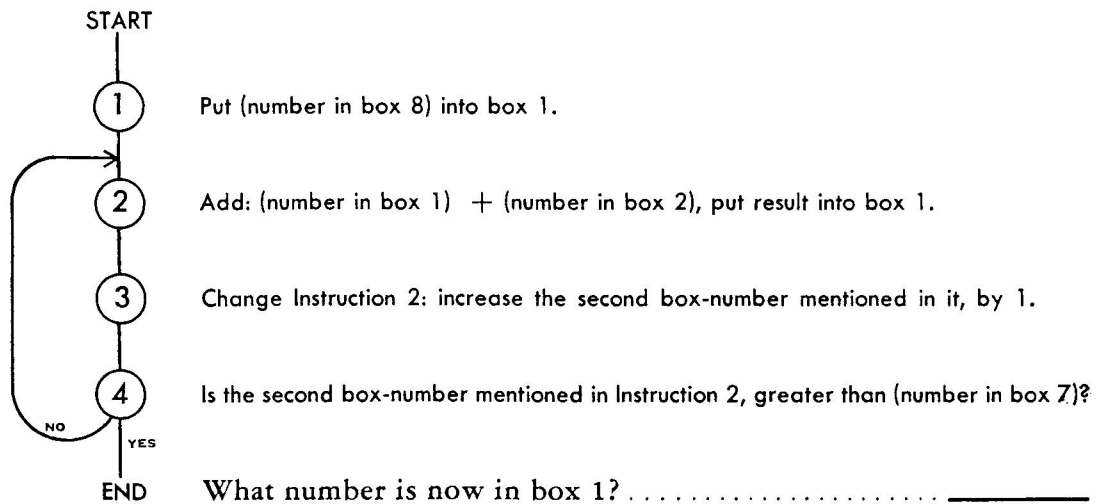

What number is now in box 5? .....

**DO NOT TURN THE PAGE UNTIL YOU ARE TOLD TO DO SO**

# EXAMPLE B:

The Core Memory Project

| Box No. | 1 | 2 | 3 | 4 | 5 | 6  | 7 | 8 |
|---------|---|---|---|---|---|----|---|---|
|         | 3 | 7 | 2 | 1 | 5 | 12 | 4 | 0 |

**DO NOT TURN THE PAGE UNTIL YOU ARE TOLD TO DO SO**

**NOW, GO BACK AND READ THE DIRECTIONS AGAIN**

Be sure to refer to the directions as often as necessary during the test, if you have any doubt whatever about the "ground rules".

The directions are complete, and no questions will be answered by the supervisor.

## The Core Memory Project

| Box No. | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8  | 9 | 10 | 11 | 12 |
|---------|---|---|---|---|---|---|---|----|---|----|----|----|
|         | 2 | 1 | 1 | 4 | 6 | 5 | 2 | 12 | 5 | 19 | 1  | 0  |

START

①

Add: (number in box 3) + (number in the box whose number is in box 8), put result into box 4.

②

Multiply: (number in box 7)  $\times$  (number in box 7), put result into box 7.

③

Is (number in box 4) = (number in box 9)?

YES

NO

④

Add: (number in box 4) + (number in box 1), put result into box 4.

⑤

Subtract: (number in box 7) - (number in box 2), put result into box 7.

⑥

Add: (number in box 3) + (number in box 9), put result into box 10.

⑦

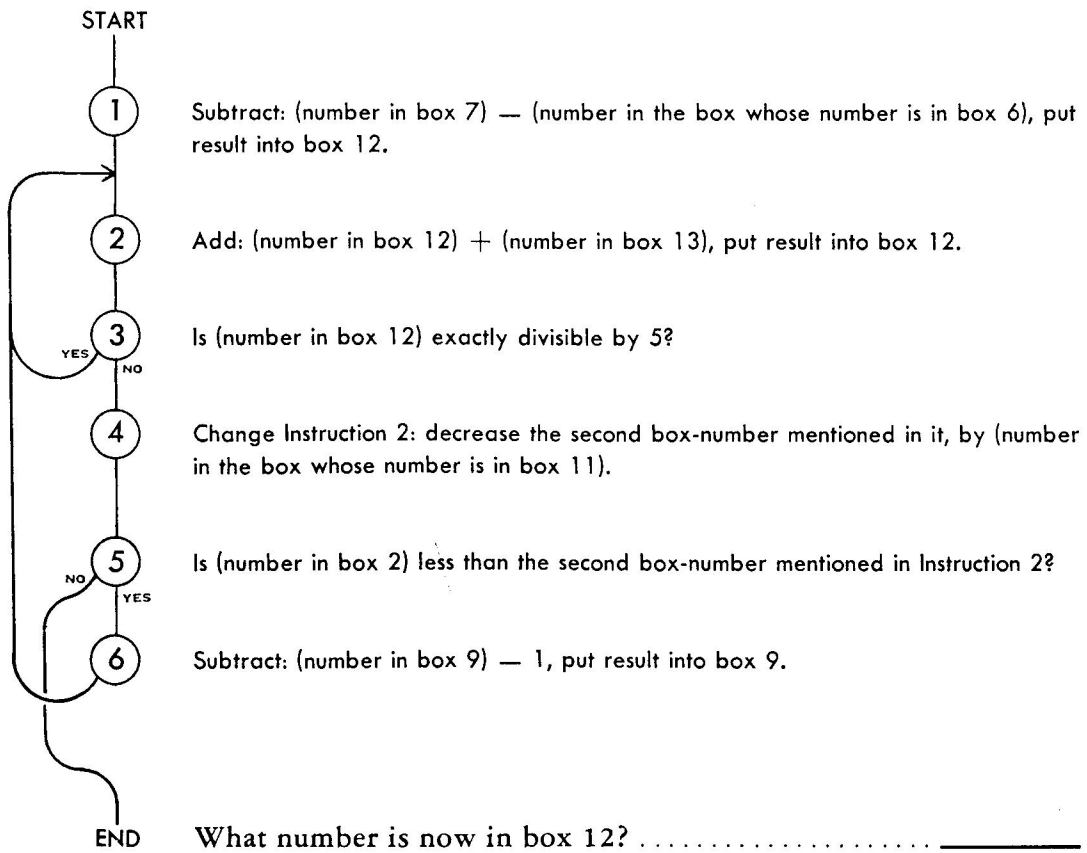

Subtract: (number in box 7) - (number in box 10), put result into box 11.

END

What number is now in box 11? .....

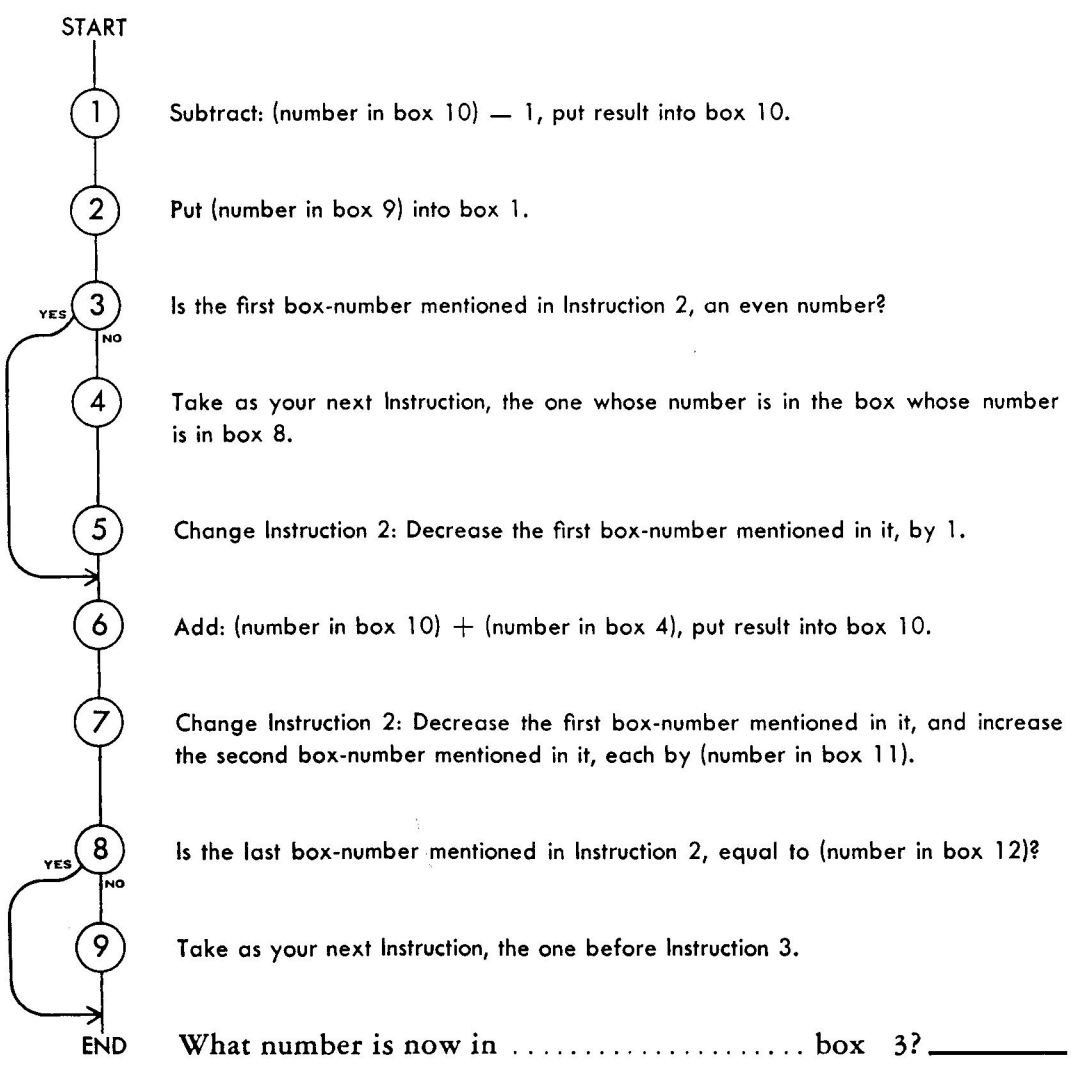

The Core Memory Project

|         |   |   |   |   |    |   |   |    |   |    |    |    |    |
|---------|---|---|---|---|----|---|---|----|---|----|----|----|----|
| Box No. | 1 | 2 | 3 | 4 | 5  | 6 | 7 | 8  | 9 | 10 | 11 | 12 | 13 |

|         | 2 | 11 | -9 | 2 | -2 | 12 | 6 | 9 | 6 | 3  | 1  | 4  |

## READ THESE DIRECTIONS

### The Core Memory Project

The problems in the next part of the test are slightly different from those you have just done.

In these problems, you will be told exactly what each flow-chart is to accomplish, and you must decide what number must be in a specified box, in order that someone following the flow-chart will do the required job—*no more and no less*.

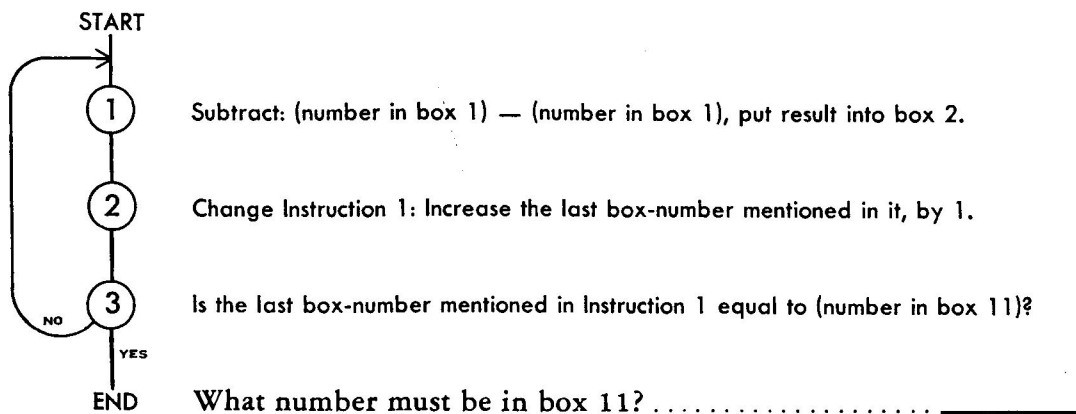

**TURN THE PAGE, AND CONTINUE**

## The Core Memory Project

The purpose of the following flow-chart is to put a zero in each of the boxes: 2, 3 and 4.

In order to accomplish exactly this—no more and no less—what number must be in box 11?

| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8  | 9  | 10 | 11 | 12 |
|---|---|---|---|---|---|---|----|----|----|----|----|
| 7 | 9 | 2 | 2 | 8 | 4 | 1 | -9 | -3 | 6  |    | 4  |

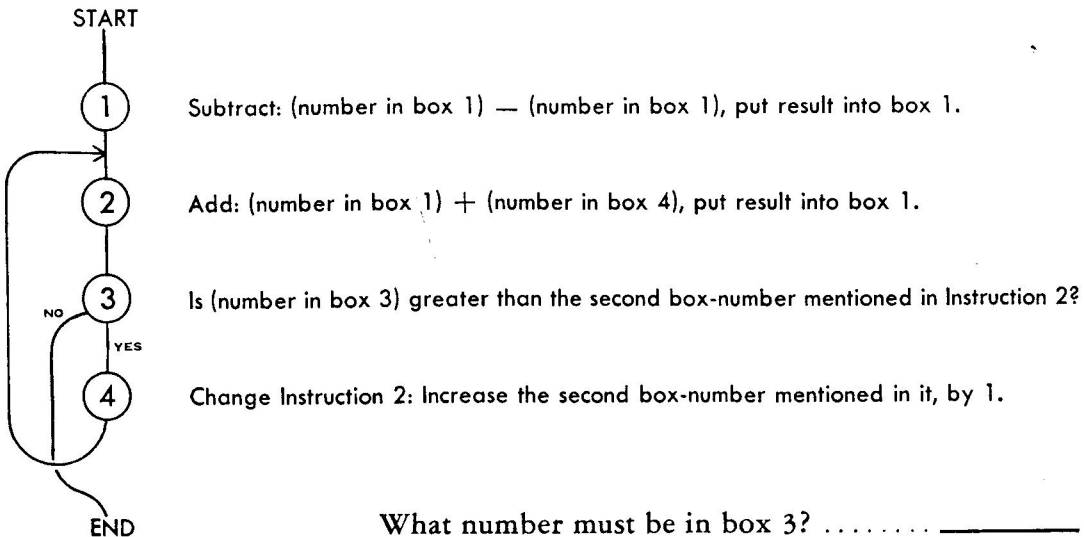

**5**

The purpose of the following flow-chart is to add up the numbers in boxes 4, 5, 6 and 7, and put the total in box 1.

In order to accomplish exactly this—no more and no less—what number must be in box 3?

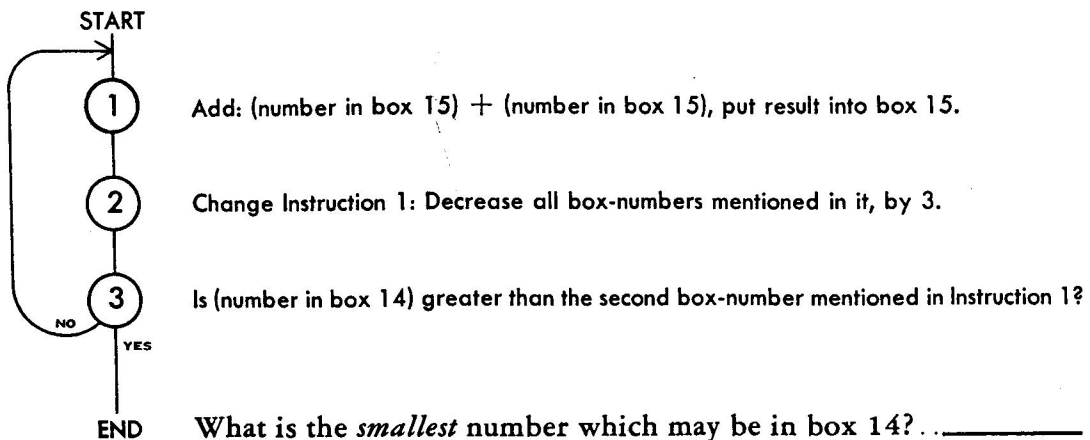

|   |    |   |   |   |   |   |    |    |
|---|----|---|---|---|---|---|----|----|
| 1 | 2  | 3 | 4 | 5 | 6 | 7 | 8  | 9  |
| 3 | 15 |   | 2 | 1 | 4 | 3 | 12 | 10 |

What number must be in box 3? ..... \_\_\_\_\_

The purpose of the following flow-chart is to double the number in each of the boxes: 15, 12, 9 and 6.

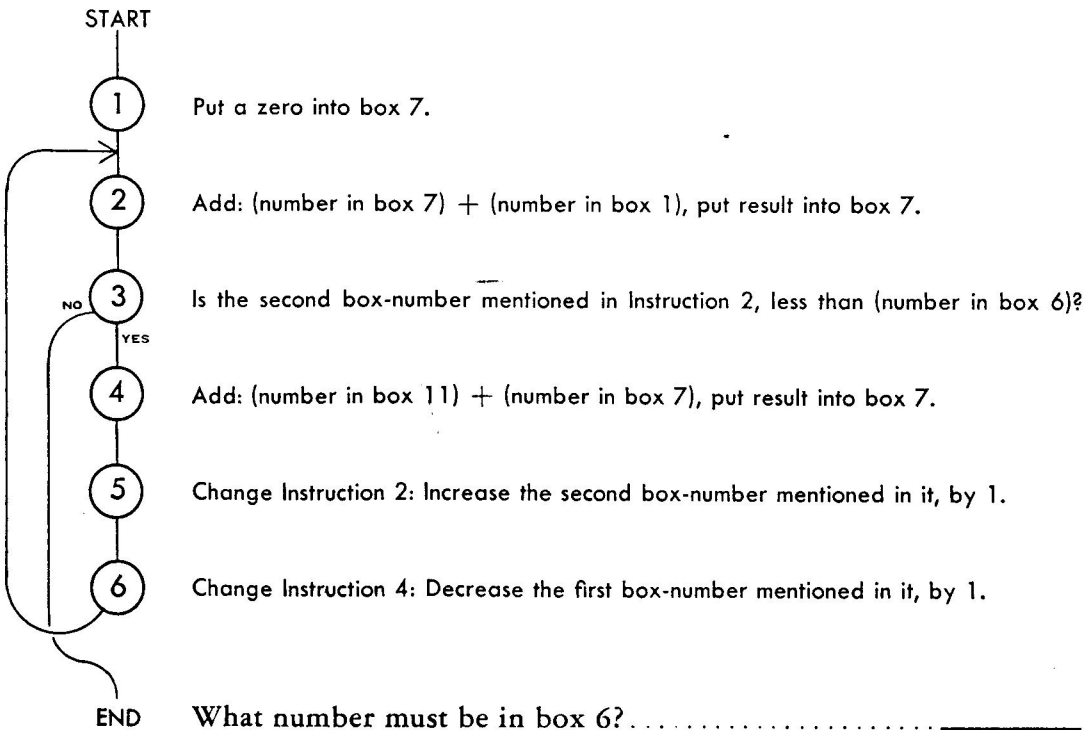

In order to accomplish exactly this—no more and no less—what is the smallest number which may be in box 14?

The Core Memory Project

The purpose of the following flow-chart is to add up the numbers in boxes 1, 2, 3, 4, 9, 10, and 11, and put the total in box 7.

In order to accomplish exactly this—no more and no less— what number must be in box 6?

## READ THESE DIRECTIONS

### The Core Memory Project

In the following problems, you are told something about the result, and you must determine what the contents of the boxes must have been, in order to obtain that result.

In these problems, the expression (number in box X) is abbreviated as (X).

For example: "Is (4) greater than (7)?"

means "Is (number in box 4) greater than (number in box 7)?"

**In each of the following problems, no two boxes contain the same number.**

**TURN THE PAGE, AND CONTINUE**

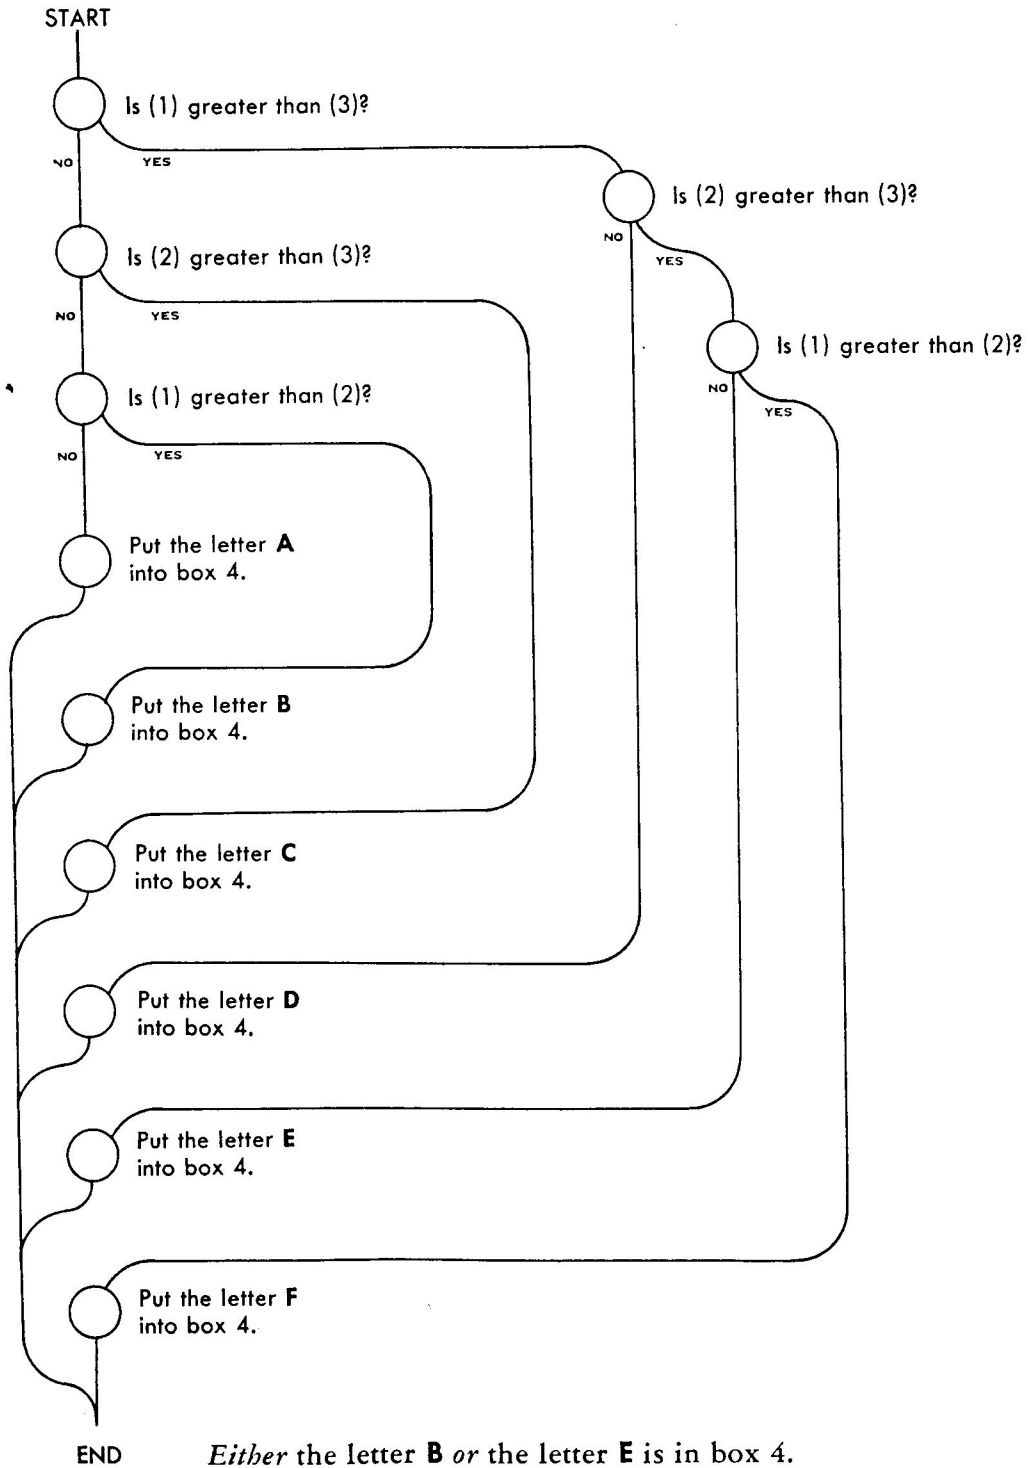

Which of the boxes 1, 2, 3 contains ..... the largest number? \_\_\_\_\_

the smallest number? \_\_\_\_\_

Which of the boxes 1, 2, 3 *cannot possibly* contain the largest number? \_\_\_\_\_

the smallest number? \_\_\_\_\_

Which of the boxes 1, 2, 3 *cannot possibly* contain the largest number? \_\_\_\_\_

the smallest number? \_\_\_\_\_

**READ THESE DIRECTIONS**

In the following problem, you must grasp the significance of the individual steps in the flow-chart, and correct an error which has been deliberately placed there.

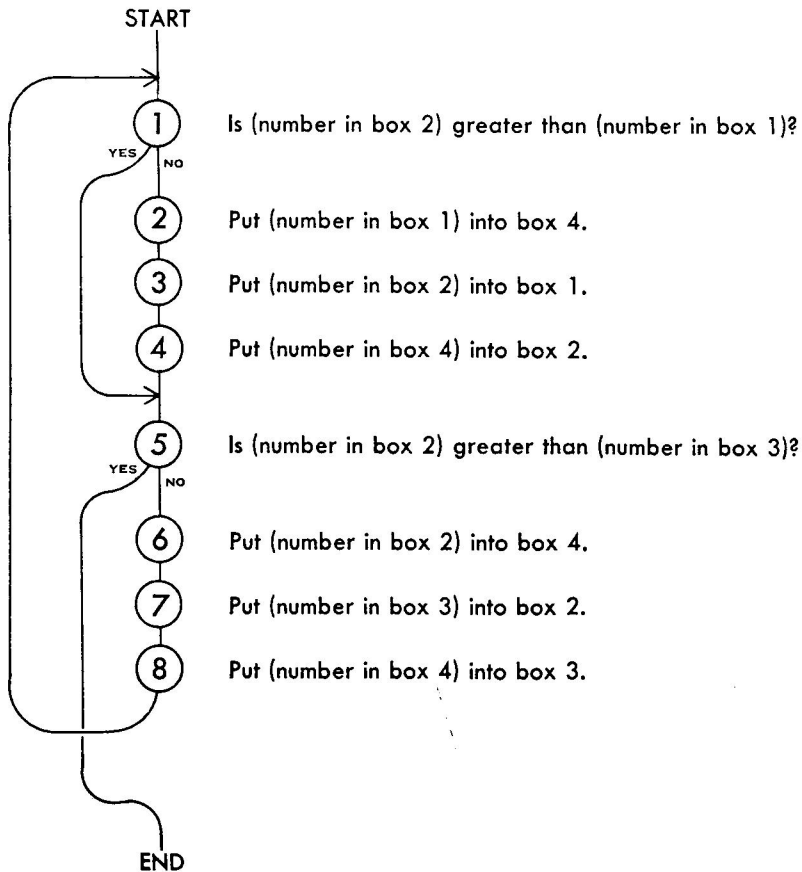

The object of the following flow-chart is to rearrange the numbers in boxes 1, 2, 3 in such a fashion that, at the end:

- Box 3 will always contain the largest number;
- Box 1 will always contain the smallest number.

However, this flow-chart is *incorrect*. As it stands, it will not accomplish the desired purpose.

Which one instruction must be changed to correct the flow chart?

In order to correct this flow-chart, we must change Instruction No. \_\_\_\_\_  
 So that the first box-number mentioned in it is box number ..... \_\_\_\_\_  
 and the second box-number mentioned in it is box number ..... \_\_\_\_\_
