

Pictorial Tour Of New Giessen Facilities

The Core Memory Project

The completion of the new wing of the Giessen, Germany, Plant brings the total floor space to 10,500 square meters, tripling the space available when operations began in 1959. Housed in the new addition is the European Electronic Service Training Center headed by J. Scherf, apart from various additional or expanded facilities.

At the new facilities, students are able to receive instructions in English, French, German and Italian, on the Class 29, fully automated Class 29, 461, 468 and 430, 450 proof machine, **COMPU-TRONIC**[®] machine, 390 and 395. Provisions are currently being made for training on the 500 Series, with an additional instructor being added to the staff by the end of the month.
