

AT&T Globalyst™ 515

Overview:

The AT&T Globalyst™ 515 is designed to fulfill base system customer requirements primarily in large company - enterprise and departmental market segments and secondarily in the small/medium company and SOHO (Small Office/Home Office) market segments. It may be used as a stand-alone system for business professionals to increase personal productivity or as a client in a network. Diskless models are available for use as a networked client. The optimized fit for network usage is guaranteed by offering a large selection of pre-installed network adapters and choice of several tested and certified network operating systems. Even use as a small desktop server can be accomplished. With the available business audio and CD-ROM features, the uses for the AT&T Globalyst™ 515 extend to Multimedia.

The AT&T Globalyst™ 515 serves as a base platform for Value Systems like Network, or Vistium™ Solutions where price/ performance, upgradability and expandability are crucial to win.

The AT&T Globalyst™ 515, optimized in terms of communication-focus, environment-friendliness with ergonomic design, investment protection and high performance, meets the expectation you demand in a PC and from a PC company. This high-power system is equipped with Plug and Play BIOS, utilizes intelligent hardware-based power management with superior network functionality, supports PCMCIA technology, and is tested with popular network adapters and operating systems. This way, the system can easily be tailored to your operating environment. Furthermore, the Globalyst™ 515 is Energy Star compliant. Additionally, AT&T Vistium™ Share Software, currently available in the English language, is prebundled on all U.S. and Canada Globalyst 515 Windows and Windows for Workgroups models to allow you to work collaboratively, share applications, and simultaneously modify files with other team members associates, and business partners.

The AT&T Globalyst™ 515 is designed to compete against the IBM ValuePoint Spacesaver Si, the Dell OptiPlex L (V), the Dell NetPlex, the Compaq ProLinea, and the Hewlett Packard Vectra VL2e & VL2.

International System Features/Available Models: Processor Table

Processor	Model ID
i486SX/33	3232-2500-80XX
i486SX2/50	3232-3500-80XX
i486DX2/50	3232-5500-80XX
i486DX2/66	3232-6500-80XX
i486DX4/100	3232-7500-80XX
