WorkSaver 300 Display Screens

The NCR WorkSaver 300 Series systems not only give you a choice when it comes to power, flexibility and configuration, but also a choice when it comes to the type of screen you would like. Currently, two monochrome screens and one color screen are available for you to choose from.

WorkSaver 300's wide variety of screens gives you the flexibility to choose screens according to your budget as well as your information processing needs, yet have the convenience of working with one vendor, no matter which type of display you choose.

As an example, our 15" color screen offers a graphics display, which is most useful for any type of business which needs to have a graphic representation of numeric information, as well as for applications such as financial planning.

12" monochrome character display

Displaying 29 lines by 80 characters

12" monochrome character/bit-mapped display

Displaying 29 lines by 80 characters

15" character/bit-mapped color display

720 by 348 pixels bit-mapped graphics monitor

Displaying 34 lines by 80 characters or 34 by 132

In The Future:

15" character/high resolution bit-mapped

1024 by 510 pixels bit-mapped graphics monitor

Displaying 34 lines by 80 characters or 34 by 132

15" monochrome bit-mapped display

Displaying 29 lines by 80 characters

All screens offer the ergonomic advantages of tilt and swivel. There's a brightness control, as well as a very high character resolution. These features enable an operator to work more comfortably and productively.
