WorkSaver Printer Attachments

In many offices today, paper handling is a laborious as well as time-consuming process. Electronic typewriters save time over their non-electric predecessors; yet, they still require the manual insertion of paper. So revisions and original keyboarding are not done fast or efficiently.

Furthermore, even office automation has not always improved the flow of paperwork. The effectiveness of many printer attachments has been reduced by mechanical and operative limitations.

However, with the NCR WorkSaver Series of printer attachments there are no such limitations; paper handling has never been easier, never been more efficient.

NCR offers a complete series of printing attachments for both the LQP-30 and LQP-50 letter-quality printers. Attachments that form a vital link in the efficient flow of paperwork. These attachments are completely compatible with our line of acoustic covers. But most important, they enable stand-alone operators and those in cluster environments to enjoy the benefits of faster throughput and easier operation.

Attachments available include the following:

- Single Bin Sheet Feeder —gives you large capacity for one paper type
- Dual Bin Attachment —lets you use both letterhead and plain paper
- Envelope Attachment —gives you automatic feeding of envelopes for addressing
- Bi-Dir. Forms Tractor —handles your continuous forms with ease
- Cut Sheet Guide —gives you straight, professional looking printing by lining up your single sheets evenly

Whatever your paper-handling requirements, whether you're a small business or a large organization, NCR has the specific attachment that will increase your efficiency. All attachments are accessed at the keyboard by a few simple keystrokes. Your operators become more productive because their trips to the printer are greatly reduced. Production is uninterrupted except to load paper and retrieve printed documents.

WorkSaver printer attachments. Another step in NCR's commitment to office automation. At NCR we make office automation make sense.
